

With us, you can provide a worker FAST AND EASY, in a single day, including all of the following steps: CV collecting, interviewing, employee registration for insurance, contracts and all of the following administrative work.

Before the cooperation begins, the employer is obligated to provide identification information of his company and if he is searching for the employees, to send a request by e-mail or call.

The employees hired by OZ Bulevar will get an official work offer, with a standard/individual contract for temporary and occasional jobs. The client certifies the achieved performance of the worker and returns the instruction to us.

Working and earning records are kept by us. In a name of law, we register and deregister workers, we keep a record of calculations of earnings and payments, after the work is done.

A contract for temporary and occasional jobs is opened when you work through a youth cooperative. The contract can last from one to 120 (one hundred and twenty) working days.

The contract can be terminated or extended, on a daily basis, depending on your needs.

In large systems (such as public tenders), where is a need to organize a special protokol about cooperation, the employer and us will make a general contract about our business cooperation.
